

Acidity
10-200 & 100-2000 ppm

AE264

Directions for use:-

1. Take 10 ml of water sample to be tested in the test jar.
2. Add 2 drops of AC 1 mix well to dissolve.
3. Now drop wise * add AC 2 # counting the number of drops while mixing until the colour changes from colourless to pink.

* If the expected Acidity is more than 200 ppm, then use AC 3 instead of AC 2.

Calculations:

Total Acidity ppm as CaCO_3 = 10 X (Number of Drops of AC 2)
= 100 X (Number of Drops of AC 3)

*For controlled addition of drops, follow instructions on the dispense
